About this publication

This publication describes the reports available in PRM. It explains how to configure and generate report output.

What's new in this publication

Here is what's new in this publication.

May 2024

Following are the topics, and the changes made for PRM 9.3:

- [Rule Report](#)

Changes made to include the Rule Status and Rule Name in the report.

August 2023

Following are the topics, and the changes made for PRM 9.2.4.0:

- [Transactions Count Report](#)

Modified the date range information. You cannot set the From date field to today's date.

June 2023

Following are the topics, and the changes made for PRM 9.2.3.2:

- [Transactions Count Report](#)

Modified the date range information. The From and To date fields now default to yesterday's date, and the button that was labeled Today is now labeled Yesterday.

December 2022

Following are the topics, and the changes made for PRM 9.2.2.0:

- [Mark Fraud report](#)

Added a step for the new Date Filter field, which enables users to generate the report output based on either the Mark Date, or the Transaction Date.

- Fraud Analyst User Guide

1. Getting started

System Reports:

- System Audit Report
- Active Dimensions Report
- Transactions Count

Business Reports:

- Rule Report
- Queue Report
- Total Fraud Losses
- Mark Fraud
- Analyst Performance
- User Activity

2. Active Dimensions Report

Available to team administrators, supervisors and managers, the Active Dimensions Report shows how many Dimension IDs had at least one transaction processed within a predefined time period.

Once you create a job, the report runs once a day. To view the report data:

1. Go to **Reports > System Reports > Active Dimensions**.
2. Select a predefined Date Range. Selections include:
 - **Daily** - Shows the previous day's data.
 - **Weekly** - On the first day of each week, shows data for the previous week.
 - **Monthly** - On the first day of each month, shows data for the previous month.
 - **Quarterly** - Shows data for the previous three months.
 - **Semiannually** - Shows data for the previous six months.
 - **Yearly** - Shows data for the previous 12 months.

NOTE

Data is calculated for the predefined date range only, and results are available after the date range has passed. For example, if you choose Weekly, you will see data corresponding to the previous full week (Monday through Sunday), and not data from the current week.

3. Use the **Detail level** buttons to indicate the level of detail you want to see.
 - Summary shows the Dimension, subtotal by Dimension, and grand total online.
 - Detail shows the Dimension, Portfolios, count by Portfolios, subtotal by Dimension, and grand total.
4. Click **Apply**.

The following is an example of a Summary report, using a Weekly date range.

- (Optional) Click the **Export All** icon to export the report to .csv, PDF, or .xls file formats.

3. Activity History Report

The Activity History Report enables you to view user activity for a specified period. A team administrator can view the activity history for the members of their team or teams. A fraud analyst can view only their own activity history.

By default, the data displayed in the report is filtered on the following values:

- Users: All
- Actions: All
- Statuses: All
- Dimensions: All
- Date Range: Today

To run a report, do the following:

1. Go to **Reports > Business Reports > Activity History Report**.
2. In the Users section, select the user or users you want included in the report data. You can select or deselect all members of a team by selecting or clearing the checkbox for that team.

You can use the quick filter at the top of the Users section to quickly find the users or teams you want included in the report data.

By default, all users are selected.

3. In the Actions section, choose which actions to include in the report data.

You can use the quick filter field at the top of the Actions section to quickly find the action or actions you want included in the report data.

By default, all actions are selected.

4. In the Statuses section, choose which statuses to include in the report data by selecting them from a tree structure.

You can use the quick filter field at the top of the Statuses section to quickly find the status or statuses you want included in the report data.

By default, all statuses are selected.

The following table describes the statuses.

Status	Definition
Completed	Status for actions taken by a user or the system (auto user) and represents a successful action.
Requested	Available only if External Message Manager (EMM) was enabled in the system, for more details see the <i>Notifications API Guide</i> .

Status	Definition
Failed	Available only if EMM was enabled in the system, for more details see the <i>Notifications API Guide</i> .
Submitted	Available only if EMM was enabled in the system, for more details see the <i>Notifications API Guide</i> .

5. In the Dimensions section, choose which dimensions or cross dimensions to include in the report data by selecting them from a tree structure.

You can use the quick filter field at the top of the Dimensions section to quickly find the dimension or dimensions you want included in the report data.

In the date range section, select or specify the date range for the actions that you want included in the report data.

You can use the **From** and **To** fields to specify a custom range, or you can select one of the following pre-defined periods: Today, Past week, Past 2 weeks, Past 3 weeks, Past 4 weeks, Past 30 days, Past 60 days, or Past 90 days.

If you select one of the pre-defined periods listed above, the **From** and **To** fields are updated automatically to reflect the start and end dates for the selected period.

By default, the **From** and **To** fields are set to today's date and **Today** is selected.

6. When you finish setting the filter options for the report, click **APPLY**.

The system uses your filter settings to retrieve the data that meets the criteria and displays that data in a grid. The grid contains the following columns:

Action Name

The name of the action

Dimension ID

The unique ID for the dimension

NOTE

The dimension IDs in the report data are hyperlinks. Click a dimension ID to open it in the Review screen.

Dimension

The Dimension name.

Action Date and Time

The date and time of the activity.

User Name

The user name related to the activity.

Action Details

Details of the action.

NOTE

To display different report data, modify your filter settings and click **APPLY**.

To set the filter fields to their default values, click **RESET TO DEFAULT**.

7. Optional: Click the **Export All** icon to export the report data to .CSV, .XLS, or .PDF file.

If you have the Export Data Unmasked permission, you can choose to export the sensitive data unmasked.

If you filter the report data and then export it, only the report data that meets your filter criteria is exported.

4. Analyst Performance Report

The Analyst Performance Report provides a breakdown of performance statistics for individual analysts and teams. You can view summary or detailed information.

The report defaults to the following values:

- **Date Range:** Today
- **Dimension and Portfolio:** All
- **Teams and Users:** All

To run a report:

1. Go to **Reports > Business Reports > Analyst Performance**.
2. Use the calendar picker to select a date range or click a predefined time period.
3. Use the **Detail Level** buttons to indicate the level of detail you want to see (Summary or Detail).

The Summary report displays subtotals for each team. The Detail report displays subtotals for each analyst. The subtotal row includes the following calculations:

- IDs Alerted
 - IDs Not Alerted
 - Blocked
 - Unblocked
 - Missed Txn
 - Loss Prevented
 - Loss Subtotal
4. Select the portfolios you want included in the report. When you select a portfolio, you can see the teams to which it is assigned.
 5. Select the teams or analysts that you want included in the report.
 6. Click **Apply**.
 7. (Optional) Click the **Export All** icon to export the report to .csv, PDF, or .xls file formats.

NOTE | PDF is the only option that include subtotals and totals.

5. Mark Fraud Report

Available to team administrators, supervisors and managers, the Mark Fraud Report provides the details of all marked transactions over a predefined period of time.

Use this report to identify and analyze fraud trends, gauge the impact of related fraud events or fraud types, and track a fraud event over time to monitor its impact.

The following screenshot shows the fields to complete before running the report:

The screenshot displays the 'Mark Fraud Report' configuration page within the ACI system. The top navigation bar includes links for DASHBOARD, SEARCH, REVIEW, REPORTS, CONFIGURATIONS, and RISK STRATEGY & CONTROL. The main section is titled 'Mark Fraud Report' and contains a 'CRITERIA' dropdown menu. Below this, the 'Date Filter' section has two radio buttons: 'Mark Date' and 'Transaction Date', with 'Transaction Date' selected. The 'Date Range' section shows a date picker set to '2022-10-26' and a 'Today' button, along with other predefined time periods like 'Past week', 'Past 2 weeks', etc. The interface is divided into three columns: 'Dimension and Portfolio', 'Mark Type', and 'Mark Identifier'. Each column has a 'Filter' input field and a list of items with checkboxes. In 'Dimension and Portfolio', items include Card, Merchant, Customer, and Terminal, each with sub-portfolios. In 'Mark Type', items include Acct. Takeover, Counterfeit, Fraud App, Lost, Merchant, MOTO, N-R-I, Other, Stolen, BSA Violation, Correspondent Banking, General ML, and Prohibited Name List. In 'Mark Identifier', items include Not Available, Fraud Department, Branch, Law Enforcement, Claims, and Customer Service. At the bottom, there are 'APPLY' and 'RESET TO DEFAULT' buttons.

To run a report, do the following:

1. Go to **Reports > Business Reports > Mark Fraud**.
2. Choose a Date Filter by selecting either **Mark Date** or **Transaction Date**. The latter is selected by default.
3. Use the calendar picker to select a **Date Range** or click a predefined time period.
4. In the Dimension and Portfolio section, choose which dimensions and portfolios to include in the report data. Use the quick filter field at the top to search for a specific dimension or portfolio.

All dimensions and portfolios are selected by default.

5. Perform the same actions in the Mark Type and Mark Identifier sections.

All mark types and mark identifiers are selected by default.

6. Click **Apply**.

The results grid displays the following columns:

Transactions Count

The number of transactions marked with the mark type and mark identifier on the current portfolio.

Transactions Amount

The total sum of the transactions marked with the mark type and mark identifier on the current portfolio.

Alerted Count

The number of transactions from the marked transactions that were also alerted on the current portfolio.

Alerted Amount

The total sum of the transactions marked with the mark type and mark identifier that were also alerted on the current portfolio.

NOTE

The report groups the Transaction Count, Transaction Amount, Alerted Count, and Alerted Amount subtotal by portfolio, and the grand total.

7. Optional: Click the **Export All** icon to export the report data to .CSV, .XLS, or .PDF file.

8. Optional: To view a transaction from the results:

- a. Navigate to **REVIEW > REVIEW ALERTS & DIMENSION IDS**.
- b. When the RECENT DIMENSION IDS window opens, click the hyperlinked dimension ID.
The transaction opens in the Review screen.

6. Queue Status Report

Use the Queue Status Report to verify the alerts pending or reviewed for a queue.

To generate a report:

1. Go to **Reports > Business Reports > Queue Status**.
2. Select the **Reviewed** and/or **Pending** check box. Use the Reviewed option to see the number of alerts reviewed or processed for each portfolio by group.
 - a. If you selected **Reviewed**, select a custom **Date range**, or click a preset date range.
3. Select Portfolios to see the teams to which they are assigned.
4. Select teams.
5. Click **Apply** to see the report.
 - If an alert is pending for a portfolio assigned to several teams, and the queue is assigned to users from several teams, the alert is counted separately for each team.
 - If multiple users, on the same or different teams, review an alert, it will be counted each time it was retrieved from a queue by a user.
6. Click **Export All** to export the report to the report as .xlsx, .csv, or .pdf.

7. Rule Report

The Rule Report can be used to identify and monitor the rule impact. On the report, you can see the total amount of transactions alerted or alerted and marked. You can also see the false positive ratio for all rules for each portfolio grouped by rule name.

Click **APPLY** to see the report. By default, the following filters are preselected:

- Date range: Smallest date range by default
- Dimension and Portfolio - all
- Rule Type and Status -all
- Rule Name – all
- Mark types – all

To see the Rule Report under **Reports > Business Reports**, you must have Rule Report permission. It is assigned to the team administrator, supervisor, and manager roles. These roles will also be able to see all other reports assigned to the current user role under Business Reports.

To generate a Rule Report:

1. Select a date range using the calendar icon or click a date range option if you do not want to use the default date range selection.
2. Select one or more Dimensions and Portfolios to see the rule type and status of the rules which are/were assigned to the portfolios.
3. Select one or more Rule Type and Status.
4. Choose the Rule Name if you want to generate the report for a specific rule.
5. Choose the Mark Types.
6. Click **APPLY** to view results or **RESET TO DEFAULT** to clear all filters.
7. Click **Export All** to export the report to .csv, PDF, or .xls file formats.

NOTE | The report data is grouped by Rule Name and displays the subtotal for each Rule Name.

The report contains the following columns:

Dimension

Representing the Dimension Name.

Portfolio

Rule Type

Rule Name

Rule Score

Deployed

Value Y if the rule is deployed, N if the rule is not deployed, was never deployed, or deleted rules only if the rules have created alerts.

Alerted/Declined Txn Count

The total number of times a rule generated an alert for a transaction within the specified date range – (A) used for calculation of False Positive Ratio.

Alerted/ Declined Txn Amount

The total amount (sum of MD_TRAN_AMT1) of the transactions alerted by the rule for the portfolio that have a date between the Start Date and End Date selected for the report.

Alerted & Marked Txn Count

The total number of transactions the rule alerted on that were marked through the Mark screen – (B) used for calculation of False Positive Ratio.

False Positive Ratio

Calculated as A/B :1

Mark Type

The mark type specified when the transaction was marked.

Marked Txn Count

The number of transactions alerted by the rule for the portfolio and mark type that have a date between the Start Date and End Date selected for the report.

Marked Txn Amount

The total amount (sum of MD_TRAN_AMT1) of the transactions alerted by the rule for the portfolio and mark type that have a date between the Start Date and End Date selected for the report.

NOTE

PDF is the only option that includes subtotals and totals.

8. System Audit Report

The System Audit Report lists the PRM users and system users, and their actions as performed manually or automatically in the system.

To run a report, do the following:

1. Go to **Reports > System Reports > System Audit Report**.
2. In the Users section, choose which users to include in the report data by selecting them from a tree composed of teams and users.

You can use the quick filter field at the top of the Users section to quickly find the user or users you want included in the report data.

By default, all users are selected.

3. In the Audit Selections section, choose which audited actions to include in the report data by selecting them from a tree composed of Audit Types and Subtypes.

You can use the quick filter field at the top of the Audit Selections section to quickly find the actions you want included in the report data.

By default, all Audit Types and Subtypes are selected.

4. In the date range section, select or specify the date range for the audited actions that you want included in the report data.

You can use the **From** and **To** fields to specify a custom range, or you can select one of the following pre-defined periods:

- Today
- Past week
- Past 2 weeks
- Past 3 weeks
- Past 4 weeks
- Past 30 days
- Past 60 days
- Past 90 days

If you select one of the pre-defined periods listed above, the **From** and **To** fields are updated automatically to reflect the start and end dates for the selected period.

By default, the **From** and **To** fields are set to today's date and **Today** is selected.

5. When you finish setting the filter options for the report, click **APPLY**.

The system uses your filter settings to retrieve the data from the SYSTEMAUDIT table that meets those criteria and displays that data in a grid. The grid contains the following columns:

Team

For each user included in the report data, this column contains the name of the user's primary team.

Username

This column contains the name of each user included in the report data.

NOTE

If a user performed multiple audited actions within the specified period, their name would appear in multiple rows.

Role

For each user included in the report data, this column contains the role assigned to the user.

Date/Time

This column contains the data and time that each audited action occurred.

Audit Type and Audit Subtype

These two columns identify the area of the application affected by the action. For example, the Audit Type might be Screen access and the Audit Subtype Dashboard.

Audit Details

This column contains a description of the action taken by the user.

Workstation

This column identifies the workstation from which the user performed the action.

NOTE

- To display different report data, modify your filter settings and click **APPLY**.
- To set the filter fields to their default values, click **RESET TO DEFAULT**.

6. Optional: Click the **Export All** icon to export the report data to .CSV, .XLS, or .PDF file.

If you filter the report data and then export it, only the report data that meets your filter criteria is exported.

NOTE

For export to .XLS, due to Microsoft Excel cell size limitations, the information is truncated to max: 32,767 characters.

9. Total Fraud Losses report

Available to team administrators, supervisors, and managers, the Total Fraud Losses report displays losses for all fraudulent accounts, whether they were detected by PRM or by another method.

Here are the steps to view the report data:

1. Go to **Reports > Business Reports > Total Fraud Losses**.
2. Select the following filters:
 - a. **Date Range** - set to "Today" by default. You can select a specific range or a predefined range. Here are the options:
 - Today
 - Past week
 - Past two weeks
 - Past three weeks
 - Past four weeks
 - Past 30 days
 - Past 60 days
 - Past 90 days
 - b. **Dimension and Portfolio** - set to "All" by default. Clear the related checkbox to remove items as needed.

NOTE

Only Dimensions corresponding to the portfolios assigned to the user's team show. If the user is part of multiple teams, the report shows data for all portfolios assigned to all teams.

- c. **Mark Type** - set to "All" by default. Clear the related checkbox to remove items as needed.

NOTE

Only the Mark Types assigned to the Dimensions for which the user's team has portfolios assigned show.

3. Click **Apply**.
4. The report generates with the following data:

Mark Type

The mark type specified when the transaction was marked, listed in descending alphabetical order.

Marked IDs

The number of Dimension IDs marked for the portfolio and mark type value.

Marked Txns

The number of transactions marked for the portfolio and mark type value.

Total Confirmed Loss

The sum of all marked transactions.

Total Expected Loss

The total Funds at Risk value for all marked action level IDs.

Average Confirmed Loss

The average confirmed loss amount per dimension ID.

Average Expected Loss

The average expected loss amount per dimension ID.

Average Marked Txns

The average number of marked transactions per dimension ID.

Average Expected Loss Per Transaction

The average expected loss amount per transaction.

Average Days Active

The total number of days each marked action level ID was active, divided by the total number of marked action level IDs (Marked IDs).

Marked and Alerted Txns

The number of transactions that are marked for the portfolio and mark type value and were alerted by a PRM Standard rule.

Marked and Not Alerted Txns

The number of transactions marked for the portfolio and mark type value and were not alerted by a PRM standard rule.

Percentage Alerted

The percentage of transactions that are marked for the portfolio and mark type value and were alerted by a PRM standard rule.

Totals

Totals are provided for each dimension individually for each column except the Average and Percentage columns. Grand Totals are provided for the period selected for each column except the Average and Percentage columns.

10. Transactions Count Report

The Transactions Count Report provides insights into PRM daily processing. The type of report output that is displayed for the Transaction Count Report depends on the criteria you select, which includes date range and detail level. There are two detail levels: Billing (default) and Summary.

- **Billing** - This option enables you to view the report by Type of Billing Group and Group Name. The report output includes the following data:
 - **Evaluation Date** - The date for which the transaction counts and sums were calculated.
 - **Included/Excluded** - The group type indicates whether the transactions were included in the group or excluded from the group, according to the group definition.
 - **Group Name**
 - **Count** - The number of unique transactions that meet the SQL criteria for the included or excluded group.
 - **Sum** - The sum of the amounts corresponding to the unique transactions that meet the SQL criteria for the included or excluded group.
- **Summary** - This option enables you to view the report by Dimension and Portfolio. The report output includes the following data:
 - **Evaluation Date** - The date for which the transaction counts and sums were calculated.
 - **Message Name** - The message used to process the transactions.
 - **Dimension Name**
 - **Portfolio Name**
 - **Dimension ID**
 - **Count** - The number of unique transactions that were processed via a specific message and were included in each portfolio.
 - **Sum** - The sum of the amounts corresponding to the unique transactions that were processed via a specific message and were included in each portfolio.

The report criteria fields default to the following values:

- **Date Range:** Yesterday

NOTE

The button labeled Yesterday is selected by default.

The From and To date fields default to yesterday's date. You cannot set the From date field to today's date.

- **Detail Level:** Billing

NOTE

Since the data for the report is calculated by running database jobs, the most recent calculated data is for yesterday.

To run a report, do the following:

1. Go to **Reports > System Reports > Transactions Count Report**.

2. Use the calendar picker to select a date range or click a predefined time period.
3. Use the Detail Level buttons to indicate the level of detail you want to see (Billing or Summary).
4. When you finish setting the filter options for the report, click **APPLY**.

NOTE

To display different report data, modify your filter settings and click **APPLY**.

To set the filter fields to their default values, click **RESET TO DEFAULT**.
